

RECYCLING

THE NEW LIFE FOR PVB TRIMMINGS

RECYCLING - SAVE RESOURCES.

VERY IMPORTANT

- The bags must contain only one type of film.
- The bags must not contain PE interlayer films or other plastic material.
- The bags must not contain paper, labels or other foreign material.
- The bags must be implicitly closed.

COLLECTING INSTRUCTIONS

Trimmings must be collected either directly in colorless PE (polyethylene) bags provided for this purpose (see chapter provided materials) or they can be initially placed in very clean plastic or metal bins and then transferred to aforementioned PE bags. The following advises how to return the PE bags.

The PE bag must not weigh more than 20 kg.

WHAT MUST NOT BE INCLUDED IN THE TRIMMINGS BINS (I. E. PE BAGS OR OCTABINS)?

Beverage tins or packaging

Staples

Plastic and paper disposable table-ware

Food leftovers or waste as well as cigarette ash

Razor blades, other cutting tools, glass splinters

NEXT STAGE FOR THE FULL PE BAGS

Kuraray provides re-usable plastic boxes or pre-cut corrugated, octangular cardboard sheets for one-way octabins. The bottom, side panel and cover of the one-way octabin must be folded appropriately and placed on a disposable pallet measuring approx. 115 x 115 cm. Each box accomodates up to 20 full PE bags. Each bag must weigh no more than 20 kg. We would like to remind you to fill each box according to the type of film. This helps us to select and use the received boxes more rapidly. The full boxes are secured with the lid in place. This guarantees that your consignment will not be contaminated. In case of contamination the trimmings cannot be put into the recycling circuit. Please paste the label provided by Kuraray in the specified location.

It states the address of the client, the date, the type of the returned trimmings and the quantity.

Do not stock more than 2 octabins. They may break or turn over.

PE bags

One-way octabin
Dimensions: L 110 cm x W 110 cm x H 90 cm

Re-usable plastic box
Dimensions: L 120 cm x W 100 cm x H 100 cm

STORAGE OF FULL OCTABINS

Full octabins containing approx. 20 PE bags can be stacked up to 2 pallets high. Be careful to use only Kuraray original pallets or pallets of similar stability. They are made of wood and are stable, otherwise the octabins or re-usable plastic boxes may be damaged. The octabins or re-usable plastic boxes must be stored in absolute dry and not too hot indoor locations. Refrigerated storage is not necessary.

SUPPLIES FROM KURARAY FOR COLLECTION THE TRIMMINGS

We would like to list what is provided by Kuraray free of charge in order to facilitate the collection of the trimmings.

- Pre-cut corrugated cardboard sheet for one-way octabins (made up of 2 covers and side panels)
- Re-usable plastic box
- PE bags (each according to type of trimmings with appropriated labels)
- Labels
- Delivery note
- Transport documents
- Bag hanger on which the PE bag can be suspended (it can be provided at your request)
- Wooden pallets

ACCOMPANYING DOCUMENTS

If you do not have received these documents please kindly ask us for support! Please fill in the label correctly before pasting it in the specified location. Further documents are available on request.
